<https://www.linkedin.com/in/bobbyphttr>

Experienced iOS Developer with a track record of 4 years, providing solutions that improve Developer Experience and User Experience. Promoting app quality and visibility through tools and automation. I am eager to learn and explore new things!

Key achievement : Led the adoption of SwiftUI in a decade-old app with 100% engineer participation, Improved app launch time by 50%.

Work Experience

GetGo

December 2024 - July 2026

- Responsible for developing high-quality enterprise iOS applications, ensuring seamless user experience and robust functionality.
- Plan and estimate project timelines, deliverables, and resource requirements to meet organizational goals.
- Conduct app maintenance, implement bug fixes, and continuously optimize performance for reliability and efficiency.
- Oversee telematics integration with vehicles, ensuring accurate data handling and effective system connectivity.
- Collaborate with cross-functional teams to ensure successful implementation of features and solutions aligned with business objectives.

Traveloka

Jan 2021 - December 2024

- Improved App Launch Time by 50% using Xcode Profiler.
- Lead the way in SwiftUI integration within product teams, achieving 50% adoption rate in UI modules. Reached engineer's participation to 100%
- Improved visibility for app health and performance with AWS Lambda and Datadog Integration
- Contributed to app wide UI components availability, by leveraging UIKit and SwiftUI.
- Helped provide guidelines to adopt new technologies such as UT and UIT for SwiftUI and Combine for faster development speed.

Rupi Digital Indonesia

2020 - 2021

- Develop a production-ready iOS app from scratch, incorporating MVVM+C, reusable UI components, and integration with REST API.
 - Contribute for custom UI features and functionality using native UIKit
 - Addressed and resolved bugs and issues in two iOS applications.
-

Core Skills

iOS Development: Xcode, Swift, Objective C, SwiftUI, UIKit, Multithreading and concurrency (ARC or GCD), Unit testing, UI testing, App Store submission, Firebase deployment, Kotlin Multiplatform (KMP)

Infrastructure and DevOps: Ruby, Jenkins, Cocoapods, Git, Research and Technology adoption, App and User Analytics, Basic Cloud Computing with AWS EC2 + Lambda

Leadership: Communication, stakeholder management, project management, documentation, critical thinking, problem solving.

Education

Ciputra University

2016 - 2020

Bachelor of Computer Science (GPA 3.91)

Certificates

Apple Developer Academy (2019)

Languages

English (fluent), **Indonesian** (fluent)

Interests

AI and Deep Learning, Video Games, Music, Coffee, Full stack development
